Projects

Farmers Connect | Individual Project
React.js, Node.js, Express.js, MongoDB, Git/GitHub

- Developed a full-stack MERN web application connecting farmers directly with buyers, eliminating middlemen and improving price transparency in agricultural trade.
- Designed and implemented a responsive frontend using React.js and built RESTful APIs with Node.js and Express.js to handle core business logic.
- Designed the MongoDB database schema and implemented complete CRUD operations for user, product, and transaction data.
- Integrated frontend and backend using a modular architecture; managed version control and codebase using Git and GitHub.
